

## CAUTION!

### All DSL Providers Are NOT The Same!

1. Bell South the actual provider and everyone else is just a reseller.. **FALSE!**  
*Bell South is merely the physical line provider. LexiSoft has complete control over the line speed, routing, maintenance, and termination points of every DSL line.*
2. Line speed is the same regardless of the provider.. **FALSE!**  
*LexiSoft does not limit or cap port speed, allowing for tremendous potential burst rates, whereas BellSouth.net strictly regulates maximum speeds.*
3. Our company doesn't need a Static IP address.. **FALSE!**  
*Most companies either use or could benefit from a static IP address for VPN networks, web servers and internet applications. And unlike BellSouth.net, LexiSoft does not make you pay extra for one.*
4. 'Business Class' is just marketing and doesn't really mean anything.. **TRUE – WITH SOME COMPANIES!**  
*BellSouth.net, Time-Warner and other companies often use the words 'Business Class' as a way to repackage their regular residential service to unsuspecting businesses; However, LexiSoft recognizes that businesses have more complex needs than at-home users and have designed our DSL solution to meet those demands:*  
**Including at No Extra Charge:**
  - 24 x7 system monitoring done right here in Melbourne
  - Exclusive use of network routers, NOT single-station modems like the competition
  - Same-Day On-Site service at no additional charge\*

### What Do You REALLY Need?

- Q. How many people access the internet from your location each day?  
*If the answer is 3 or more, your company should have at least one DSL line*
- Q. Have you increased your office or network staff and not increased your internet connection?  
*An increase in the number of people that access the internet at your location of 20% or more can significantly impact your network and cause a loss in productivity with slower uploads / downloads and longer delays in accessing data.*
- Q. Have you increased the amount of data that you transmit over the internet?  
*An increase in the use of online banking, inventory management, an expanded website, audio / video streaming, additional locations, or telecommuting staff can signal a need for increased bandwidth.*
- Q. Do you feel that your staff is frustrated and not as productive as they could be?  
*This is often the first sign that a problem exists within your current system. We can help you determine if the issue is hardware related or bandwidth related.*

### COMING IN MAY:

( --- Tear here --- )

The advantages of Managed Servers, and LexiSoft unveils a new residential internet access service 'BrevardInternet.com'...**stay tuned!**

#### Web DESIGN Services **FREE**
