

**FREE!**  
**On-site Network Analysis and Company Network Visio**

FREE on-site Network Evaluation and Network Visio is being offered to all existing LexiSoft clients, and to new clients of LexiSoft High-Speed Access services. Analysis must be scheduled by August 14, 2003 and take place by September 01, 2003.

**Why Schedule a Network Analysis?**

Due to changing demands, most company's internal networks are dramatically different than when they were originally set in place. When evaluating a network, it is important to think "System" not "Component" and remember four key points:

1. Size - The introduction of new users, the necessary additional hubs, switches and even the operating systems of the new machines will all effect network performance.
2. Security - As viruses and hacker attacks continue to become more sophisticated and more malicious, and as the number of users who access your network grows, so does the need for increased network security and data protection.
3. Efficiency - Proper component selection, item configuration, the age of components and their compatibility with each part of the network, all greatly influence network speed and efficiency.
4. Replacement Cost - A firewall, Anti-Virus programs, and individual battery power supply's represent a small cost compared to the replacement cost of a workstation, the downtime of personnel, the downtime of a network, or even worse - the loss of company data.

**What is a Visio?**

A Visio is an easy-to-read graphical representation of your complete office network. A Visio will help lower maintenance and repair costs by providing service technicians with an accurate view of each component, its location, and of the flow of data within your network.

**New LexiSoft Anti-SPAM software stops over 13,000 messages in the first 12 hours!**

LexiSoft is pleased to report that our continuing Anti-SPAM efforts are making a significant difference in the amount of SPAM that finds it way to you, our valued clients.

We've also installed state-of-the-art Anti-Virus software to filter all incoming e-mail and help safeguard your system. These upgrades are part of the LexiSoft standards of service excellence and are provided at *no cost to you*. These upgrades effect all shared hosting accounts, their e-mail accounts and all lexisoft.net e-mail accounts.

**If you have a co-location server with LexiSoft and would like to be covered by our new SPAM and Anti-Virus software , contact your LexiSoft representative and we'll be happy to install it at *no charge to you*.**
